

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	30 September 2026
Team ID	SWTID-2026-5734
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Import Spreadsheet Data	Upload Excel/CSV spreadsheet Select the data source/table Preview imported records
FR-2	Create Transform Map	Create a Transform Map Select source and target tables Define field mappings
FR-3	Transform and Validate Data	Apply field mapping and transformation rules Validate mandatory fields and data formats Handle invalid records
FR-4	Import Data into Target Table	Run the transform/import process Insert valid records into the target table Verify imported records

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple and user-friendly interface for uploading spreadsheets and configuring mappings.
NFR-2	Security	Only authorized users can import data and modify transform maps.
NFR-3	Reliability	Data transformation should be accurate and prevent loss or duplication of records.
NFR-4	Performance	Spreadsheet upload, transformation and import should complete efficiently for normal datasets.
NFR-5	Availability	Import and transform functions should be available whenever the system is operational.
