Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Project Overview

Project Name: Import Data Using Transform Map (Spreadsheet)

Project Description: Import employee data from an Excel spreadsheet into the ServiceNow User table using an Import Set and Transform Map. Validate source-to-target field mapping, data transformation, record insertion, and error handling.

Project Version: 1.0

Testing Period: 28/9/2026 to 1/10/2026

Testing Scope

Features and Functionalities to be Tested:

1. Upload an Excel spreadsheet (.xlsx) containing employee records.
2. Create an Import Set Table to store spreadsheet data.
3. Configure a Transform Map to map source fields to target fields.
4. Map spreadsheet columns such as First Name, Last Name, Email, and Department to the corresponding ServiceNow fields.
5. Execute the Transform Map to import records into the target table.
6. Validate successful record insertion and field mapping.
7. Verify handling of duplicate records, missing values, and invalid data.
8. Validate import logs and error messages.

User Stories / Requirements to be Tested:

1. Verify that spreadsheet data is successfully imported into ServiceNow.
2. Verify that source fields are mapped to the correct target fields.
3. Verify that imported records contain accurate data.

4. Verify that duplicate records are handled correctly.
5. Verify that invalid or missing data is identified during import.
6. Verify that the Transform Map executes successfully without unexpected errors.

Testing Environment

URL/Location: ServiceNow Instance – `https://<instance-name>.service-now.com`

Credentials : Authorized ServiceNow Test User Account

Import File: Employee_Data.xlsx

Source Table: Employee Import Set Table

Target Table: User *sys_user*

Transform Map: Employee Data Transform Map

Application: ServiceNow

Browser: Google Chrome

Test Data: Employee records containing First Name, Last Name, Email, and Department.

Test Cases: Import Data using Transform Map (Spreadsheet)

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Import data using a transform map from spreadsheet	[Step 1] Prepare spreadsheet with source data [Step 2] Select and apply transform map [Step 3] Run import and verify results	Data is imported and mapped correctly according to the transform map	Data imported and mapped as expected	Pass
TC-002	Import with invalid transform map	[Step 1] Use a transform map with invalid mapping [Step 2] Run import [Step 3] Verify error handling	System shows validation error and does not import data	Validation error displayed; import not completed	Pass
TC-003	Import large volume of data using transform map	[Step 1] Prepare large spreadsheet file [Step 2] Apply transform map [Step 3] Run import and check completion	All records are imported with correct mapping and no errors	Records imported successfully	Pass
...	...	...	...	...	...

Bug Tracking: Import Data using Transform Map (Spreadsheet)

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Incorrect data mapping when using specific transform map for date fields	[Step 1] Use transform map with date format [Step 2] Import data from spreadsheet [Step 3] Check mapped values	Medium	Open/In Progress	Date values are shifted by 1 day. Need to validate format handling.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
